

The Technological Centre for Restoration and Design is a promotional project financed by the Italian Ministry of Economic Development by the ICE-Italian Trade Promotion Agency. In a peculiar market, such as the Cuban one, and in a phase of great social and economic changes, it is intended to give to the Italian companies the opportunity to be on site, dynamically, with a long term proposal, at least 2 years, of training, exhibitions, exchange programmes and events (both cultural and commercial). The "Oficina del Historiador del L'Habana Vieja" (OHC), the most important Governmental Organization for the protection and management of the Historial Core of the Capital City, partner of project, has granted the use of the entire building in Calle de di Sant'Ignazio for this common purpose. Restoration and Design, two of the many Italian Excellences, represent the starting point for a fruitful cooperation among Cuba and Italy.

The first stage of the project consists in the development of preliminary sketches defining the new distribution of the functions, the facilities design, the furniture and the technical equipments needed to reinvent a traditional Cuban colonial house into a centre dedicated to restoration and design.

FINANCING INSTITUTION

Mise | Ministero per lo sviluppo economico

PROMOTING INSTITUTION

ICE | Agenzia per la promozione all'estero e l'internazionalizzazione delle imprese italiane

CUBAN MEMBERS

OHC | Oficina del Historiador de la Ciudad de La Habana

OPERATING PARTNERS

ASSORESTAURO

President: Alessandro Zanini

Coordinator: Andrea Griletto

FEDERLEGNOARREDO

President: Roberto Snaidero

Coordinator: Francesco Baudassi

Concept design: Iris Keci

PARTICIPATING ENTERPRISES

EDILTECNICA Paolo Cicognani

Project coordinator

ARCHEORES Roberta Cairoli

Coordination of the stratigraphic analysis of the building

CRISTELLOTTI E MAFFEIS Mariano Cristelloti

Coordination of activities related to restoration works and preliminary diagnostic

GEOGRÀ Giuseppe Boselli

Laser scanner survey, modeling and rendering 3D

MAPEI Davide Bandera

Restorations materials

PIMAR Giorgina Marrocco

Stone structures

REALE RESTAURO Francesco Panacciulli

Restoration of historical lighting systems and production
